

Our Guide to GoldFish

FEEDING YOUR GOLDFISH

Feed once a day only.

Feed 1 - 2 flakes of food at a time.

When going away for 2 - 3 days do not worry as goldfish will happily survive without any food for that length of time.

When away for a longer holiday put a vacation feeding block into the bowl or tank or ask a friend or neighbour to pop in and feed them 1—2 times per week.

WATER CHANGES

Water changes should be carried out once a week to replace stale water with fresh.

Remove half the water from the goldfish bowl this can be done simply by scooping out with a small cup.

Pour fresh water from the tap into a clean bowl, bringing it to the same temperature using either boiled water or hot tap water.

Add Tap water Conditioner and mix thoroughly.

Gently pour the new water into the goldfish bowl.

TAKING YOUR GOLDFISH HOME

When you get home with your new pet, fill your bowl or tank with aired water from the tap.

Add the recommended amount of tap water conditioner to the water and mix thoroughly.

Float the fish in whilst still in the plastic bag in the bowl or tank for approximately 20 minutes as this allows the fish to gently acclimatise to any water temperature differences.

This procedure should also be followed when to complete water changes.

Release your fish in to its new home.

POSITIONING YOUR GOLDFISH HOME

Your goldfish should not be placed in or near

Direct Sunlight

High activity areas

Areas with vibration & noise (Fridges, washing machines or tumble dryers)

Sources of heat (Cookers, Radiators, heaters etc)

Ensure no household chemicals can accidentally get into the goldfish bowl.

HEALTH & FITNESS

Three steps to a Goldfishes happiness
Clean, well-oxygenated water
Space to swim and grow
Well-balanced food for energy and growth.

Check daily for signs of ill health and treat as necessary.

Signs of ill health include:

Ragged or blood streaked fins

Unusual swimming action or loss of balance.

Cotton wool like growths

Slimy white skin or fins

Cloudy eyes

White Spots

Lying still on the bottom

Clamped fins or loss of appetite

Grasping at the surface
